

Kick Factory 2

Welcome to Kick Factory 2 - and thanks for your purchase

This document explains how you download your product.

Downloading

So all you need to do is visit the Channel Robot web site, specifically this URL:

<https://channelrobot.com/product/kick-factory-2/>

When you get there you will be able to down load the Demo version of Kick Factory 2 - the demo version is simply the unauthorised version of Kick Factory 2

Follow the install instructions in the manual(included in the download) and when you get to the authorisation page simply enter the authorisation key you've been sent in a separate email

If you are having any trouble with this process please let us know through the contact page at <https://channelrobot.com>

<https://channelrobot.com/support/>

Uncompressing

Channel Robot products are downloaded as RAR archives. So uncompressing this on a Windows machine is easy, but on the Mac you will need some sort of utility program to uncompress the archive, Macs are great for some things compressing and delivering reliable archives is sadly not one of them, so we recommend Rar Expander:

You can download this FREE product here:

<https://sourceforge.net/projects/rarexpander/>

..and here's a video of how to work with it:

<https://www.youtube.com/watch?v=86l-bp3q97E&t=1s>

Have fun with Kick Factory 2.
